SUMMARY

Detail-oriented **Accessibility Engineer and Frontend Developer** with 3+ years of experience constructing inclusive, high-performance web applications compliant with **WCAG 2.1/2.2 AA standards**, Section 508, and ADA guidelines. Expert in blending automated accessibility audits (AudioEye, Axe) with thorough manual testing utilizing assistive technologies (JAWS, NVDA, VoiceOver, Keyboard-only flow). Skilled in React.js, TypeScript, and semantic HTML5 to engineer seamless, accessible digital experiences and remediate complex UI accessibility defects across enterprise platforms.

TECHNICAL SKILLS

- **Accessibility Standards:** WCAG 2.1 / 2.2 (Levels A, AA, AAA), WAI-ARIA 1 .2, Section 508, ADA Compliance, Semantic HTML5
- **Assistive technologies:** JAWS, NVDA, Apple VoiceOver, TalkBack, Screen Magnifiers, Keyboard Navigation & Focus Management
- **Testing & Auditing tools:** AudioEye, Axe DevTools, WAVE, Color Contrast Analyzer, Browser DevTools Accessibility Tree
- **Technologies:** ReactJs, TypeScript, JavaScript, NextJs, Jest, Vitest, React-testing-library, Git, Azure, Python, Django, FastApi.
- **Styling:** TailwindCSS, Material-UI, Vanilla CSS.
- **State Management:** React Hooks, Context API, Redux Toolkit.
- **Cloud Platforms**: Azure (Certified Azure Developer Associate), Familiarity with cloud deployment and AI integration, such as Azure.
- **Other Skills**: Test-driven development, Responsive Design, Micro services principles (beginner-level understanding), Version Control with Git.

EXPERIENCE

PAIT Consulting Service – Web Accessibility QA Analyst **March 2026 – Present | Remote**

- Conduct rigorous WCAG 2.1 /2.2 A/AA compliance evaluations using AudioEye automated diagnostic tools combined with manual screen reader testing (JAWS, NVDA, VoiceOver) and strict keyboard-only navigation workflows.
- Formulate comprehensive developer-focused Source Feedback and remediation specifications, detailing WCAG success criteria references, severity ratings, root-cause analyses, and executable code fixes for DOM structure, focus management, color contrast, and link context.
- Spearhead cross-functional remediation sprints alongside engineering teams using Jira and Confluence to track, re-test, and verify accessibility defect resolution throughout the software development lifecycle.
- Validate accessible design patterns, including custom ARIA widgets, modal focus traps, live regions (`aria-live`), and skip navigation menus across diverse browser and device combinations.

Cedar Consult – Software Engineering Tutor **June 2025 – February 2026 | Remote, United Kingdom**

- Deliver engaging and age-appropriate software engineering lessons to students aged 12–16.
- Teach foundational and intermediate concepts in programming, web development, and problem-solving, tailored to young learners.
- Design interactive, hands-on coding activities to spark creativity and build practical skills using tools like Scratch, HTML/CSS, and JavaScript.
- Foster a positive and inclusive learning environment, encouraging collaboration, curiosity, and confidence in technology.
- Track student progress and provide personalized guidance to support individual learning goals.

Infinion Technologies – Frontend Engineer **July 2024 – September 2026 | Onsite, Lagos, Nigeria**

- Built a secure business application integrated with the **Microsoft Identity Platform**, improving authentication and authorization reliability by **20%**.
- Designed and implemented an **AI-powered identity verification system** using **Azure AI Vision SDK**, achieving approximately **40% improvement in fraud detection accuracy** through human liveness and government-ID validation; developed with **Reactjs**.
- Collaborated with a **four-member team** to modernize the company website using **React.js** and **TypeScript**, resulting in an estimated **35% improvement in performance and maintainability**.
- Developed a comprehensive **SmartAfCFTA Learning Management System (LMS)** with **Google authentication**, document-based learning, and **Redux Toolkit** for API calls and state management, reducing state-management boilerplate by **40%**.
- Built key **SmartAfCFTA platform features**, including a **business directory** and **custom duty calculator**, increasing platform usability and cross-border business engagement by approximately **25%**.

StemLab Africa – Web Development Tutor **October 2023 - June 2024 | Lagos, Nigeria**

- Developed and delivered a web development curriculum tailored to students' age and skill levels, introducing foundational concepts of **HTML**, **CSS**, and **JavaScript**.
- Conducted interactive and engaging lessons to ensure students understood key principles, practiced coding, and gained hands-on experience in web development.
- Organized practical exercises and projects, enabling students to apply their knowledge creatively by building simple and functional web pages.
- Supported students in preparing for external coding competitions, fostering confidence and technical proficiency.
- Promoted teamwork and peer learning by encouraging group activities to collaboratively solve coding challenges.

EDUCATION

2016 – 2023 **Federal University of Technology Minna, Niger State.**
Bachelor of Technology in Library Information Technology Second Class Upper honor (2:1)

2026 – Present **University of Lagos**
Masters in information technology (In Progress)

CERTIFICATION

MICROSOFTCERTIFIED: AZURE DATABASE ADMINISTRATOR **June, 2025.**

AWS CERTIFIED: CLOUD ESSENTIALS **April, 2025**

MICROSOFT CERTIFIED: AZURE AI DEVELOPERENGINEER **January, 2025.**

MICROSOFT CERTIFIED: AZURE DEVELOPER ASSOCIATE **December, 2024.**

SECTION 508: WHY SECTION 508 **October 2026.**
